## Credit Card Fraud Detection

Anonymized credit card transactions labeled as fraudulent or genuine

### Description

#### Context

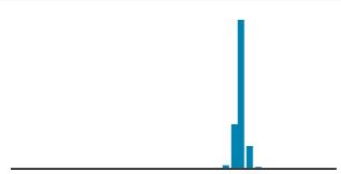

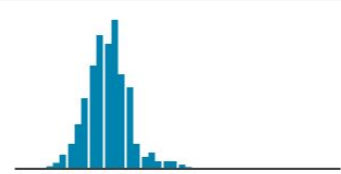

It is important that credit card companies are able to recognize fraudulent credit card transactions so that customers are not charged for items that they did not purchase.

#### Content

The datasets contains transactions made by credit cards in September 2013 by european cardholders.

This dataset presents transactions that occurred in two days, where we have 492 frauds out of 284,807 transactions. The dataset is highly unbalanced, the positive class (frauds) account for 0.172% of all transactions.

# Skewed data

### Undersampling

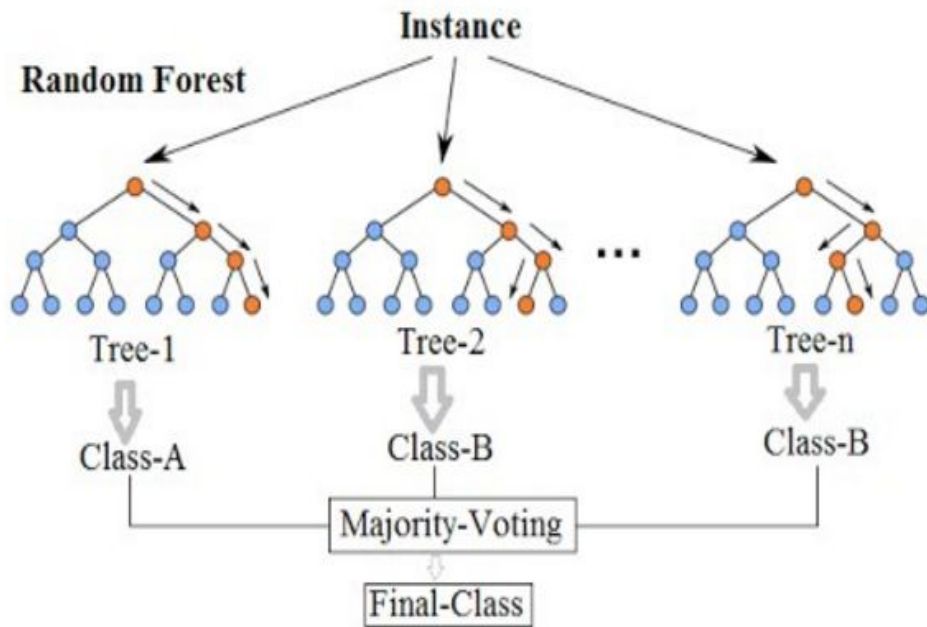

### Oversampling

# Random Forest Simplified

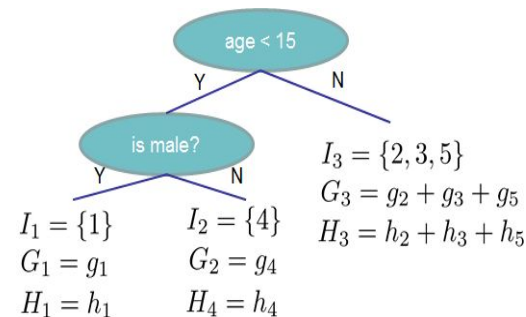

For a 3-dimension space, its Hyperplane is a plane

Instance index    gradient statistics

- |   |  |            |
|---|--|------------|
| 1 |  | $g_1, h_1$ |
| 2 |  | $g_2, h_2$ |
| 3 |  | $g_3, h_3$ |
| 4 |  | $g_4, h_4$ |
| 5 |  | $g_5, h_5$ |

$$Obj = -\sum_j \frac{G_j^2}{H_j + \lambda} + 3\gamma$$

The smaller the score is, the better the structure is

**Table 1** Bảng confusion matrix chuẩn

	Predicted positive	Predicted negative
Actual positive	True positive TP	False negative FN
Actual negative	False positive FP	True negative TN

Covid19-FN >> FP  
Satisfaction- FP matters  
Margin - FN matters

$$\text{accuracy} = \frac{TP + TN}{n^+ + n^-} = \frac{TP + TN}{TP + TN + FP + FN}$$

$$F_1 \text{ score} = \frac{2 \cdot TP}{2 \cdot TP + FP + FN} = 2 \cdot \frac{\text{precision} \cdot \text{recall}}{\text{precision} + \text{recall}}$$

How many selected items are relevant?

Precision =  $\frac{\text{true positives}}{\text{true positives} + \text{false positives}}$

How many relevant items are selected?

Recall =  $\frac{\text{true positives}}{\text{true positives} + \text{false negatives}}$

$$\text{MCC} = \frac{TP \cdot TN - FP \cdot FN}{\sqrt{(TP + FP) \cdot (TP + FN) \cdot (TN + FP) \cdot (TN + FN)}} \quad (2)$$

**Table 4** Bảng ranking dự đoán

Classifier	MCC	F1-Score	Accuracy
MCC ranking			
Random Forest	0.78872		
SVM	0.78626		
XGBoost	0.77352		
F1-score ranking			
SVM		0.77966	
Random Forest		0.77500	
XGBoost		0.76647	
Accuracy ranking			
Random Forest			0.99951
SVM			0.99933
XGBoost			0.99931

“It is the province of knowledge to speak, and it is the privilege of wisdom to listen.” —*Oliver Wendell Holmes Sr.*
